

HARRAOU SOHAIB

Future engineer in IT-cyber security and web developer

PROFILE

IT-CCN student passionate about embedded systems and new technologies, looking for challenges to improve his technical skills and develop innovative solutions, ready to contribute to stimulating projects in IT and cybersecurity.

EDUCATION

Engineering cycle: Computer Engineering, Cybersecurity and Digital Trust

ENSET Mohammed VI

2023 - Present

DUT: Embedded systems

EST Fes

2021 - 2023

Bac Pro Electrotechnique, Communicating Equipment

Lycée Tamansourte-

Marrakech

2018 - 2021

LANGUAGE

- Arab
- English
- French

CERTIFICATES

- Become a Software Developer "30 hours 26 min" (LinkedIn Learning)
- Microcontrollers & IoT 2022 (Orange Digital Center)
- Networking Essentials (Cisco Networking Academy)

+212-687181086

EXPERIENCE AND PROJECTS

PFE internship: Design and development of a website & Study of embedded cards 2 months

EST Fes

- Creation of a website for the Embedded Systems sector in the EST of Fes, with a dashboard to control visitor content. (Tailwind, Laravel, MySQL, etc.)
- Study and projects on the ESP32-CAM, the Arduino Vidor 4000, and the Raspberry Pi 4.

End of Study Project: IoT Sun Tracker

EST Fes

IoT solar tracker connected to a web server for control and visualization through an online dashboard. It uses LDR sensors and fuzzy logic, combining different elements such as Arduino, web languages and Python(Flask) and firebase for dashboard back-end.

Project: Restaurant Reservation Site

-

A restaurant reservation site offering a customer page displaying the available menu and allowing you to reserve a table on an available date. An associated dashboard allows the administrator to manage the available dates, tables and menu. It also allows you to view reservations made by customers. (Tailwind, Laravel, MySQL...)

SKILLS

Programming: JavaScript, C/C++, Python, PHP, VHDL, Assembly

Front-End: HTML, CSS, jQuery, Bootstrap, Tailwind, Vue.js

Back-End: Laravel, Flask, Node.js

Database: MySQL, SQLite, Firebase

Project management: Git, GitHub

Operating system: Windows, Linux

Embedded board: Arduino, ESP, Raspberry Pi, PyBoard, STM32, MKR vidor 4000

Soft: Versatile, Multitasking, Critical thinking, Problem solving
